Dear Resident / Business,

**Hogarth flyover full closure – six weeks from 19 July until 31 August**

This summer, Hogarth flyover will be closed for six weeks from Saturday 19 July until 31 August 2014 in order for Transport for London’s contractors Conway Aecom to replace the flyover deck. The flyover is a single lane eastbound road which carries traffic from the A316 onto the A4 Great West Road.

**Why are we doing this work?**

The flyover requires essential improvement works as the concrete deck has significantly deteriorated and must be replaced to ensure continued safety and availability to users.

The works comprise a full deck replacement, replacement of the parapets, repair of the steelwork, and improved lighting on the slip road where the A316 merges with the A4. After the works have been completed the roundabout will be landscaped and replanted and repair works will be carried out in the subway.

**How will this affect you?**

The closure from 19 July coincides with the school holidays when traffic levels are lower. No traffic will be able to use the flyover during this time. The Hogarth roundabout from the A316 will remain open however delays can be expected. Drivers are advised to allow extra time for their journey and where possible, avoid travelling through the Hogarth roundabout.

In early August a crane will be stationed on the A316 southbound lanes (adjacent to the flyover) for five nights to lift the new deck into place. To allow for this activity there will be night time closures of a section of the A316 southbound lanes between 22:00 and 06:00.

Works will take place throughout the day and night so that the repairs can be completed in the shortest time possible and to avoid any long term disruption. The majority of noisy activities will be carried out during the day time.

Additionally in the area, Wandsworth Council are carrying out essential works to refurbish Putney Bridge from 14 July. The works will affect journeys over a wider area than the immediate vicinity of Putney Bridge. Traffic is expected to be congested in the surrounding area especially during morning and evening peaks, with alternative river crossings likely to
be most congested. We advise drivers to allow extra time for journeys and, where possible, to change route to avoid the disruption.

London Buses will operate service from both ends of the bridge, and bus passengers who would usually cross the bridge will need to make their way across to the other side to continue their journeys. Bus passengers from affected routes who cross the bridge on foot will be able to continue their journey on to appropriate services on the other side.

TfL has set out plans to ensure that bus passengers don’t lose out and don’t pay twice when their journeys are affected by the bridge closure. Please visit the following link for further information: http://www.tfl.gov.uk/travel-information/improvements-and-projects/putney-bridge
